-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on January 23, 2009 has been entered.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 12, 13, 21, 29 and 32-38 are rejected under 35 U.S.C. 103(a) as being unpatentable over Petyaev (WO 03/017992) in view of Ruggeri et al (U.S. Patent No. 6,369,075).

Petyaev discloses the treatment of atherosclerosis with a combination of azithromycin and a metal chelator such as aspirin (page 10) but does not disclose a method of reducing apolipoprotein- B levels in the vascular system. However, Ruggeri et al disclose that a patient in need of apolipoprotein-B secretion inhibition is a patient having a disease or condition in which apolipoprotein-B plays a role in the disease or condition such a patients having or are at risk of having atherosclerosis, hyperlipidemia and hypercholesterol (column 23, last two lines and column 24, lines 1-10). Therefore, a person having ordinary skill in the art at the time the claimed invention was made would have been motivated to administer the combination disclosed by Petyaev to

Art Unit: 1623

patients in need of reduction of apolipoprotein-B levels since such patients having or are at risk of having atherosclerosis are in need of such reduction.

Applicant's arguments filed January 23, 2009 have been considered but are moot in view of the new ground(s) of rejection.
